Report on Cyberattack Against Our Company

May 26, 2026

We regret to inform you that our information systems were recently targeted in a cyberattack by an unauthorized third party, resulting in the encryption of certain internal servers. The current status of the incident and our responses are as follows.

On May 17, 2026, we detected a system anomaly affecting our servers. Following an investigation, we confirmed on May 18, 2027 that some of the servers under our management had been encrypted by ransomware.

To prevent any further impact, we have isolated our internal network and are taking the necessary steps with the relevant authorities.

At this stage, we have not confirmed any unauthorized external disclosure or exfiltration of data. However, we have established an incident response task force and, with the support of external experts, have begun investigating the cause of the incident, whether any information has been leaked, and the scope of the impact. We will continue to work diligently to clarify the situation as promptly as possible.

We sincerely apologize to all stakeholders for the considerable inconvenience and concern caused by this incident. We will promptly provide further updates as soon as the cause of this incident, the full extent of its impact, and other relevant details are confirmed.
